

## **Incuity to Exhibit Campus Energy Management System At APPA Conference & Expo in Vancouver, July 8-10**

**Vancouver, B.C., Canada, April 6, 2009** – Incuity Software, a Rockwell Automation company, will show and demonstrate the IncuityCEM Campus Energy Management application at the 2009 APPA conference and exposition, to be held July 8-10 in Vancouver, B.C., Canada. APPA is an association that promotes leadership in educational facilities for more than 5,000 facilities professionals at more than 1,500 educational institutions throughout the United States, Canada, and abroad.

Rockwell Automation's Incuity Software group will be located in Booth 310 at the APPA annual conference, which runs July 8-10 at the Vancouver Convention Center, in beautiful Vancouver, B.C., Canada.

IncuityCEM is an application built on top of the IncuityEMI platform specifically to serve the campus energy management market. It is intended for developing solutions that aggregate and provide visibility into the disparate factors affecting building performance and operational efficiency to achieve significant, sustainable reductions in energy costs. Incuity is already working with a handful of "vision" customers to develop this market opportunity.
